# ABOUT US

## INNOVATIVE ENGINEERING SOLUTIONS

SamaGulf is a Contracting and Maintenance company located HO in Riyadh and providing services all over KSA We are mainly doing the MEP Contracting, O&M and Testing commissioning services throughout the time, we have been in construction activities in private and government projects.

SamaGulf strives on a continuous basis to supply high standard services through innovation and ongoing investment in highly professional Administrative personnel, Technical and Engineering staff and a skilled work force to bring out the best and high standard services as fulfillment to our set missions commitments. Working in close partnership with clients, we gather and interpret requirements, provide expert technical advice, and manage high caliber engineering teams throughout each contractual life-cycle. This detailed, quality managed approach ensures the consistent delivery of professional engineering services – to budget and timescale.

### **Integrity**

We take a personal approach to every project and contract, and are always on hand to provide our clients with expert advice and support throughout the life-cycle of each project.

### **Culture**

We are deeply committed to an open, transparent, highly ethical and inclusive team- orientated culture, and support the continuous career progression of our staff through training and development

### **Excellence**

We utilise state-of-the-art engineering technologies and operate within the strict confines of a integrated management system. Totally dedicated to providing high-quality engineering services, we ensure that quality policies are fully understood, implemented and maintained

### **Divisions**

Contracting, Power Solutions, Services, Low Current Systems, Industrial Automation, O&M, Testing & Commissioning services

SamaGulf Services offer full project capability, from initial ideas stage through to generator specification, logistics planning, on-site installation, commissioning and testing of electrical and mechanical equipment through to subsequent warranty support, maintenance and aftercare. We provide a complete service to deliver a fully operational power generation installation system, be it large or small and powered by conventional diesel or more modern fuels that reduce our clients' carbon footprint.

Our commitment as principal contractor for the supply of power generation systems and equipment means we take full responsibility (subject to contract) for all generator plant, all associated switchgear and controls, mechanical movement and installation equipment, all underpinned by Method Statements, Risk Assessments and partnering with the main contractor.

We also has a great depth of knowledge in specialist fuel tanks, fuel management, pumping and fuel systems linked to generators. Your owner can provide as necessary FAT testing prior to delivery and SAT once equipment has been installed on site.

# QUALITY

## OUR QUALITY STANDARDS

At SamaGulf, solving customer challenges is second only to keeping everyone safe and healthy. We don't compromise our focus on HSE for better business results. Our commitment to safety will minimize the impact on the environment, control risks to our employees, and maintain safe work practices. Our dedication will match our commitment so that each and every Sashma employee takes personal ownership of their own safety and the safety of others.

Turning our commitments into practice is at the heart of our Journey to ZERO. Simply stated, it's a concerted effort to achieve ZERO health, safety and environmental incidents every day, all the time. There are many areas within Sashma where this is happening now. Our ZERO goal is to make it happen around the clock, everywhere.

SamaGulf will continue to keep its strategic focus on these key HSE areas:

- Effective leadership and commitment
- Continuous improvement of our ManagementSystem
- Training and competency of our employee workforce
- Providing mechanisms for employees to communicate and address risk
- Continuous improvement of technology and processes to mitigate HSE impact
- Verification of performance through robust audits, and communication of key learnings

### QUALITY POLICY

Strives to fulfill the needs and expectation of our customers by offering consistent quality in all our services.

Implements its Quality Policy through QMS which is binding for all the employees. No unauthorized alterations or deviations from the QMS are permitted.

Reviews its Quality Policy through regular management review meetings to ensure that service quality is maintained in line with the customer's expectations.

Provides sufficient and suitable resources to implement and maintain the Quality Management System.

Provides an environment that fosters a spirit of pride in workmanship and teamwork among employees.

### QUALITY OBJECTIVES

It is our objective to provide the satisfaction to our customers by providing high quality products on time, every time.

We are committed to providing safe working places to all of our employees.

Our company aims to expand operation by establishing branches to closely monitor our Customer's needs.

# COVERAGE

## SERVICE ENGINEER NETWORK COVERAGE

With field engineers strategically located throughout the Kingdom of Saudi Arabia, SamaGulf Services has the ability to provide an outstanding customer service solution. Our experience and abilities range from individual field service visits to multiple installation projects.

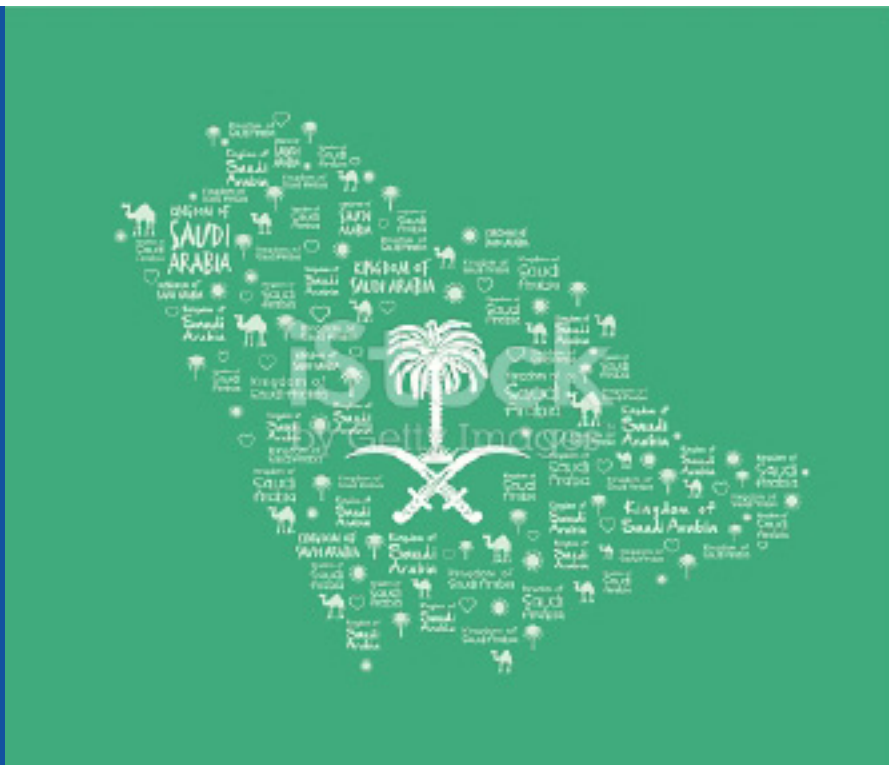

Our engineers are capable of undertaking a wide range of tasks that require a competent, mobile engineering solution backed by a highly efficient engineer distribution system.

SamaGulf's Service Engineers are supplied with mobile workshop vehicle.

The current fleet of 6 vehicles consists of Hiace Van (2), Nissan Pickup(3), Ford Pickup with Tail Lift(1)

Each one of these service vehicles is equipped with a full range of consumable parts. These include: -

- Filters - air, oil, fuel and water
- Various sizes of fan belts
- Various sizes of hoses / bandages and jubilee clips
- Gasket / jointing material
- 25 litres of lubricating oil, antifreeze and de ionised water
- Electrical leads
- Starter batteries
- Temperature / Pressure switches
- Various solenoids, relays, fuses and lamps
- Coolant heaters
- Battery chargers

# SOLUTIONS

SamaGulf offers a comprehensive range of services to support our customer's power continuity requirements. Services include building the business case, designing solutions that will meet all the operational requirements, as well as implementing and supporting equipment in the field. Sashma Power's engineering team also has the expertise to audit, upgrade and support existing generator implementations and manage a project end to end.

## CONSULTATION & DESIGN SOLUTION

SamaGulf Power Consulting Engineers are available for a free consultation to rapidly provide a high level power continuity solution design, cost estimate and assist with business case qualification.

SamaGulf Power understands how the Power Continuity business case relates to the various market segments. We can help qualify and document your business case at conception and our project managers take responsibility for the project right up to completion, commissioning and handover to

## INSTALLATION SERVICES

We will site survey your building at no cost to offer you a choice of backup generator options to suite your budget, to find the most cost effective system.

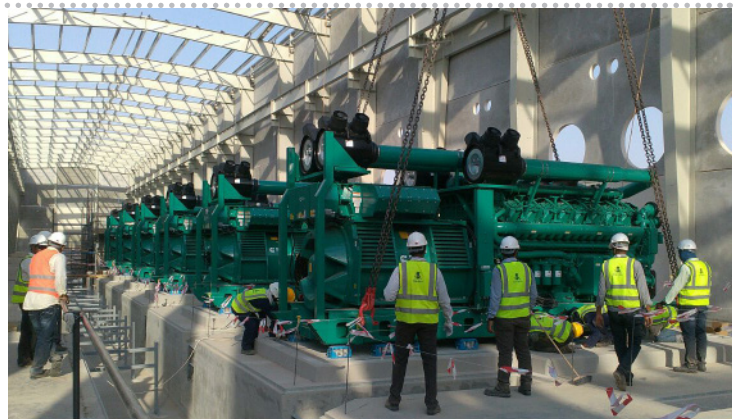

SamaGulf will design from scratch a purpose built generator system, providing the schematics and electrical drawings that you will need should planning applications be required.

## PROJECT MANAGEMENT

All projects are handled by a dedicated team of Project Managers, Technical Sales Support staff, Project Engineers, Mechanical and Electrical Design Engineers based in our regional network of offices. They are highly qualified and experienced in providing solutions to complex power generation requirements.

From start to equipment handover, SamaGulf engineers work with you throughout the life of the project to ensure that your exact requirements are met.

# SOLUTIONS

## MAINTENANCE SERVICES

### Planned Generator Maintenance Packages

Service and maintenance of diesel generators is key to backup power reliability. A well-planned maintenance programme is essential to the operation of any emergency power generation system. As there is no such thing as a 'maintenance free' power supply system, all diesel generators need to be serviced regularly to ensure that they are operating efficiently and that their start-up batteries are in good working order. Weak or undercharged starting batteries are one of the most common causes of standby power system failures. Even when kept fully charged and maintained, lead-acid starting batteries are subject to deterioration over time and must be replaced periodically when they no longer hold a proper charge. Only a regular schedule of inspection and testing under load can prevent diesel generator starting problems.

A proven track record of generator maintenance for complete reliability in the provision of standby power generation has led SamaGulf's long association with clients in industries where emergency power supplies are a vital lifeline.

### Contract Maintenance Packages

We offer a range of generator maintenance and servicing contracts to suit every customer requirement from simple repair through to 24 hour 365 days a year service contracts with guaranteed response times to site.

All our generator service and maintenance contracts are backed up by our 24-hour call out and support team.

We offer:-

24 hour coverage nationwide

Guaranteed fast response times

Service of all major diesel engine brands

# SOLUTIONS

## Testing & Commissioning

SamaGulf having our well qualified and trained service engineers team, we provide the services of testing and commissioning of diesel Power Plants, all equipment's and accessories, pumping station, electrical sub stations, control system etc ,We have all required special tools and instrument's for the testing services, All our tools and test equipment's are calibrated by third party.

## DIESEL FUEL POLISHING & CLEANING

Diesel engine fuel, when bulk stored for extended periods, can easily become contaminated with any number of foreign bodies from water and dirt to airborne microbes – a situation recognized by many of the major oil companies who now recommend that fuel and fuel tanks are cleaned on a regular basis.

Contaminated fuel can have a serious impact on engine life, performance and reliability, in particular where high pressure common rail injection systems are used on modern engines. Fuel polishing systems offer simple and reliable solutions to the problem faced by operators and rental companies who store diesel in environments subject to water ingress or general contamination.

In each case, fuel is pumped from storage tank and polished removing virtually 100% of water and all particles down to 5 microns before returning back to tank, eliminating the expense of totally removing or replacing the fuel. SamaGulf provides complete solution and system installation according to your plant diesel storage capacity requirements.

# WORKSHOP

## **Service Team :**

It is independently managed by each project by Service Manager under the supervision of General manager. The Service team contains the Service Engineers, Sr Mechanical Technicians, Electricians, Mechanics, unskilled technicians and labor in each discipline. Apart from the regular subcontractors and supplies we had our own 150+ no's of work force available in different categories. We have the warehouse facility of an approximate plinth area 2500m<sup>2</sup> located in the Riyadh-Sulay area exclusively used as the warehouse for spare parts and consumables storage.

We normally keep regular maintenance spare parts of all service contract project equipment's. This facility is backing up the field work as the prompt delivery of the materials as and when required.

## **Service Workshop :**

We have our service workshop located near Sulay Industrial area. We carry out repairs, over hauling of various types of engines and Diesel generator sets in this facility.

We are equipped with all required special tools, work table, engine mounting stands and handling equipment's. All our engineers and technicians are well trained and experienced in the trouble shooting, repair and overhauling of engines.

We have very talented electrical team who can attend LV and MV electrical switchgear , ATS and Paralleling Master Control panels.

All engines overhauled in our workshop shall be tested with resistive load bank and upon passing the satisfactory full load test, the units will be delivered to customer. We provide three months or 2000 hours warranty for all the engine overhauling works carried out by us.

# TRAINING

Enhancing the expertise of our employees ensures that, as a business, we maintain up-to-date skills and qualifications while developing highly competent people who are ready and able to take on future challenges.

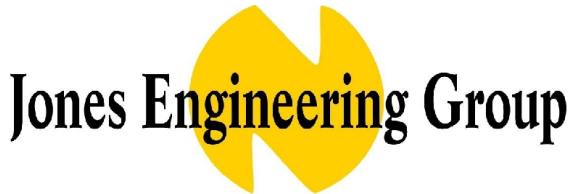

SamaGulf values its staff highly and believes that it is in the interests of the Company and employees that each member of staff is given the opportunity to develop their skills, capability and knowledge. The Company aims to encourage staff to achieve new skills to maintain and increase self esteem and motivation as well as to be proud of their part in improving the Company's ability to deliver services required by customers and the quality of the service we provide as a Company.

Employee development at SamaGulf is a collaborative process in which employees and managers share responsibility to align individual development needs and career opportunities with the company's business requirements and growth targets. SamaGulf's employees receive regular performance and career development reviews, where they discuss annual work goals, training objectives and development needs.

Regular feedback and review is the cornerstone of our performance management procedures. We focus on establishing a shared understanding of how employee performance contributes to the achievement of company goals, with positive safety behaviours and our values underpinning every individual's approach to every area of their role.
